OCEANZ COLORS

Color dye post-processing of parts produced by Selective Laser Sintering

3D printed parts manufactured by Oceanz can be post-processed to obtain a high quality end product. One of the available options is color dye. During the dye process the part is submerged in a pigmented hot color bath. All external surfaces will be colored with an impregnation depth of approx. 0.5 mm.

Color dye is available for Oceanz PA12, PA11, GREY and PAGF Anthracite.

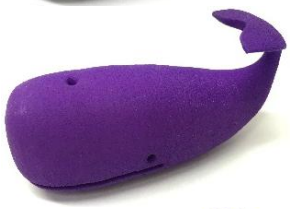

Please note that for Oceanz GREY and Oceanz PAGF Antracite the resulting color will be of darker appearance.

Oceanz Black – *Skin safe*

Oceanz Coral Red – *Skin safe*

Oceanz Purple

Oceanz Orange – *Skin safe*

Oceanz Violet – *Skin safe*

Oceanz Brown – *Skin safe*

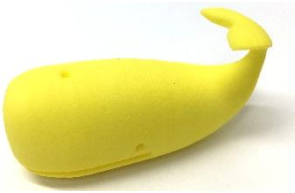

Oceanz Pink – *Skin safe*

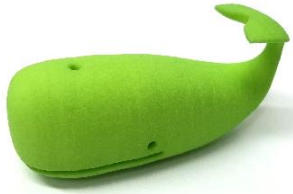

Oceanz Beige – *Skin safe*

Oceanz Sky Blue – *Skin safe*

Oceanz Yellow – *Skin safe*

Oceanz Green – *Skin safe*

Oceanz Neon

With the exception of Oceanz Neon and Oceanz Purple, the above colorants meet the strict requirements of the globally recognized OEKO-TEX® Standard 100, with exception of Class I (baby articles).

Please note that validation is based on laboratory results. Despite our effort to provide accurate images of each color, actual colors may vary slightly. ***If specific properties are critical, or RAL color match is required, always contact us so we can inform you how to obtain required specifications!***

All information in this datasheet is based on appropriate testing, further details of which are available on request and is stated to the best of our knowledge and belief at the time of publication. It is presented apart from contractual obligations and does not constitute any guarantee or warranty express or implied of properties or of process or application possibilities in individual cases. The data are subject to change without notice as part of our continuous development and improvement processes.
